

PROJECT HT

A HOME-THEATRE STORY PART II

Earlier, we provided you with a complete guide to set up your own home-theatre. Alternatively, you can consider professional installers for the added advantage of their expertise, which can do wonders to achieve your dreams. Following are some home-theatre installers operating in India with a showcase of some of their projects.

PROJECT BY **SOUND WIZARD**

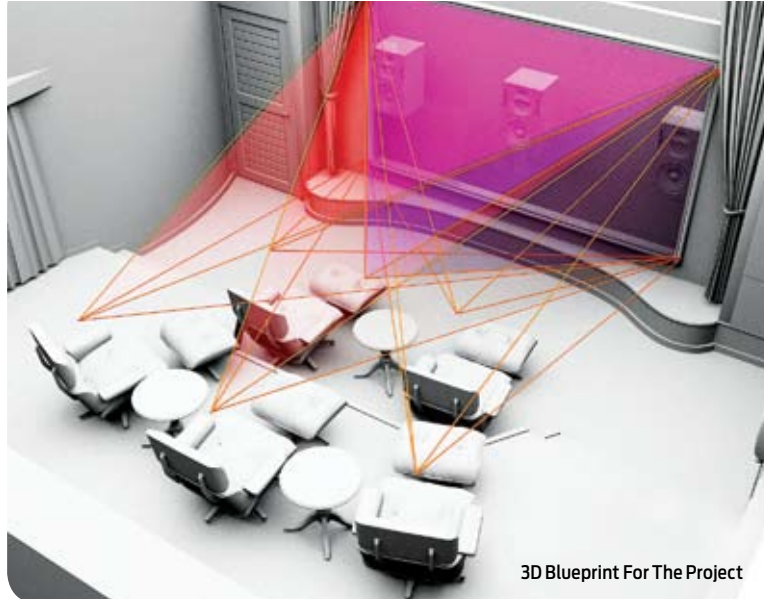

illustration by espace

Acoustic Treatment

A classical grand home-cinema room with a lot of acoustical diffusion treatment on the walls. This is to evenly spread the surround field making the room sound larger than its actual size. A full room in a room floating shell design. Offers 100% soundproofing and excellent low frequency bass absorption.

3D Blueprint For The Project

Total Cost

Rs 1.5 Crore

Equipment Rs 65 lakhs (Approx)

Room Acoustics And Interiors

Rs 25 lakhs (Approx)
